Body Language

What is the meaning of body language?

Body language is the nonverbal way people communicate through their physical behavior, rather than words. It includes:

- Facial expressions as smiling, frowning, raising eyebrows.
- Gestures like hand movements, nodding.
- Posture standing tall not looking nervous, slouching and leaning in.
- Movements as the way you walk and move.

- Eye contact by looking directly and avoiding gaze.
- Avoid Pointing.

Tone of Voice

Clarity : Speak clearly so every word is understood.

Pace : Maintain a steady speed; avoid speaking too fast or too slow.

Pauses : Use pauses to emphasize key points and give the audience time to absorb information.

- **Pitch & Intonation** : Vary your voice tone to keep the audience engaged (avoid sounding monotone).
- **Volume** : Adjust your voice so it's audible to everyone without shouting.
- **Emphasis** : Stress important words to highlight your message.
- **Warmth & Confidence** : Use a friendly but confident tone to build trust.

Feedback

1.What ?

Feedback is specific, helpful advice. It's not just "good job" or "bad job."

2. Why ?

For the Presenter: To see their "blind spots" and know what the audience is thinking.

For You: To practice analyzing what makes a presentation great (which helps you, too!).

3.How ?

“What Went Well...” (Start with the good)

“Even Better If...” (Suggest the improvement)

“What Went Well...” (Ends with the good)

(Sandwich Feedback)
